Nabtesco at “IFPEX2021” (Tokyo)

The 26th International Fluid Power Exhibition (IFPEX2021) will take place for three days at Tokyo International Exhibition Center (Tokyo Big Sight) in Tokyo during October 6-8, 2021.

Nabtesco Power Control Company will exhibit not only Nabtesco’s high-end travel units, swing units and control valves for hydraulic excavators, but also the various hydraulic equipment for non-excavator applications, such as cranes and loaders.

Furthermore, considering the next generation IoT solutions, a series of electrically controllable control valves, a space saving “NDS” (Nabtesco Dual-bypass System) hydraulic system for mini-excavators, which improves fuel efficiency and operability, as well as “Naizo” series electromagnetic proportional valves, which has excellent expandability will also be introduced.

In addition, online Nabtesco’s virtual booth is also available at the same time.

You are welcome to visit Nabtesco’s booth either physically or virtually and feel the “moving it, stopping it.” technologies of Nabtesco during IFPEX2021.

– General Information –

- Date : October 6th (Wednesday) – 8th (Friday), 2021 10:00 – 17:00
Venue: Tokyo International Exhibition Center (Tokyo Big Sight) South Hall
Access to Venue: Rinkai Line – Approx. 7 minutes walk from “Kokusai-tenjijo” station
Yurikamome – Approx. 3 minutes walk from “Kokusai-tenjijo-seimon” station
For more information – <https://www.bigsight.jp/english/visitor/access/>
Official URL: <https://www.ifpex.jp/2021/eng/>
Hall Location: South Hall F-50
Online booth: URL : <https://forms.gle/YDUV8PWqYZQg9xE7A> (registration to access)
(Registration starts on October 4th; exhibition period: October 6th – 15th)
Exhibit: 1. Hydraulic Units for excavators and cranes (travel, swing and winch)
2. “NDS” hydraulic system for mini-excavators
3. Electrically controllable U series control valves
4. “Naizo” series electro magnetic proportional valves
