

Development of Automatic Door Platform AD-LINK and Launch of Service

Nabtesco Corporation (headquarters: Chiyoda-ku, Tokyo; President & CEO: Kazumasa Kimura) is pleased to announce that it has developed AD-LINK, a platform for automatic doors that links the doors with various devices and gathers data on people flow around them via the network, and will launch a new maintenance service incorporating this product.

The new maintenance service to be launched will enable visualization of the operational status of automatic doors by installing network devices in Nabtesco's NATRUS automatic door series. By advancing maintenance services, such as providing timely reports on operational status, proposing operational improvements, and immediately providing notification of any anomalies with the automatic doors, the product will contribute to reducing the operational burden of building managers and improving the safety and convenience of passers-by.

Going forward, we will utilize AD-LINK for the marketing efforts of retail stores and verification of the advertising effectiveness of digital signage through gathering and analyzing people flow data around automatic doors. We will also create new added value for building owners and users through automatic doors by, for example, applying the product to facilitate the passage of self-propelled robots by connecting it with smart building system networks.

* AD-LINK is a registered trademark of Nabtesco.

■About Nabtesco <https://www.nabtesco.com/en/>

Nabtesco was established through the integration of Teijin Seiki Co., Ltd. and NABCO Ltd. in 2003. It is a manufacturer of machine components, and with its unique motion control technology, supports the automation of manufacturing sites as well as safe, secure and comfortable land, sea and air transportation.

In the automatic door business, Nabtesco became the first to develop an automatic door in Japan in 1956 and now has a share of about 55% in the Japanese market for automatic doors for buildings, which represent its core product in the business. The company supplies “NABCO” branded doors in Japan and “GILGEN” branded doors overseas and has a global network of sales companies that provide maintenance service for the doors. It is also a supplier of platform doors, which help ensure the safety of passengers at stations and the scheduled operation of trains. For the business Nabtesco has production bases in the city of Kobe, Hyogo Prefecture, the State of Wisconsin in the United States, the Canton of Bern in Switzerland and the city of Beijing in China.
