

Awarded the Highest Rating from the CDP
Nabtesco Included in the “Climate A List” of the World’s Leaders in
Anti-Climate Change Measures

Nabtesco Corporation (headquarters: Chiyoda-ku, Tokyo, President & CEO: Kazuaki Kotani) announces that it has been included in the Climate A List by the CDP after being recognized as one of the world’s leaders in corporate activities in terms of anti-climate change measures and strategies. The CDP is an international non-profit organization that conducts activities for a sustainable economy.

As an international NGO representing 827 institutional investors around the world who manage assets totaling 100 trillion US dollars, the CDP collects and evaluates information concerning greenhouse gas emissions from companies and their efforts towards implementing anti-climate change initiatives.

In the 2016 survey, 193 companies were included in the Climate A List from among those around the world that had disclosed their climate change-related information to the CDP. Climate A List companies account for 9% of the total number of companies that disclose information to the CDP, which uses its own established methodology to choose those with outstanding results in reducing greenhouse gas emissions and implementing anti-climate change measures in the target year.

Nabtesco was included in the List in recognition of the Nabtesco Group’s new initiative to set ambitious greenhouse gas emission reduction targets and introduce an energy monitoring system, as well as its proactive disclosure of global data through the use of the Group’s environmental information collection system, expansion of the third-party verification scope for disclosed data, and emissions reduction via the introduction of highly energy-efficient technologies to its new manufacturing facilities.

Nabtesco delivers important products comprising social infrastructure that support people’s lives based on its corporate philosophy, “The Nabtesco Group, with our unique motion control technology, will provide safety, comfort and a sense of security in daily lives as well as in any form of transportation.” The company deems as its responsibility its contribution to socioeconomic development through the production of high value-added products, and is proactively conducting CSR activities. Nabtesco will work to solve global environmental problems, winning more trust from its stakeholders by enhancing the distribution of ESG information*, such as environmental data.

*ESG information: Information related to corporate environmental measures, social activities and governance
