

Announcement about the Change of Email Attachments Encryption

In order to strengthen the information security of the company, beginning from 5th January 2015, we had implemented Email Attachments Encryption, where all files attached to email from Nabtesco will be encrypted. This time, the following changes will be made:

<Effective Date >

1st July 2016

<Point of Changes>

- The extension of attachments will be changed from 「.zi_」 to 「.zip」 .
At the moment, it is required to save the file in the local drive, and change the extension to 「.zip」 . From now on, the attached file can be opened directly from the Email. The file name will be changed from 「yyyy-mm-dd_hhmmss.zi_」 to 「yyyymmddhhmmss.zip」
- The decryption password will be sent immediately, instead of 5 minutes later.
At the moment, the email contains the decryption password will be sent 5 minutes later after the main email has been sent. From now on, the password will be sent at the same time in a separated email.

<Inquiry>

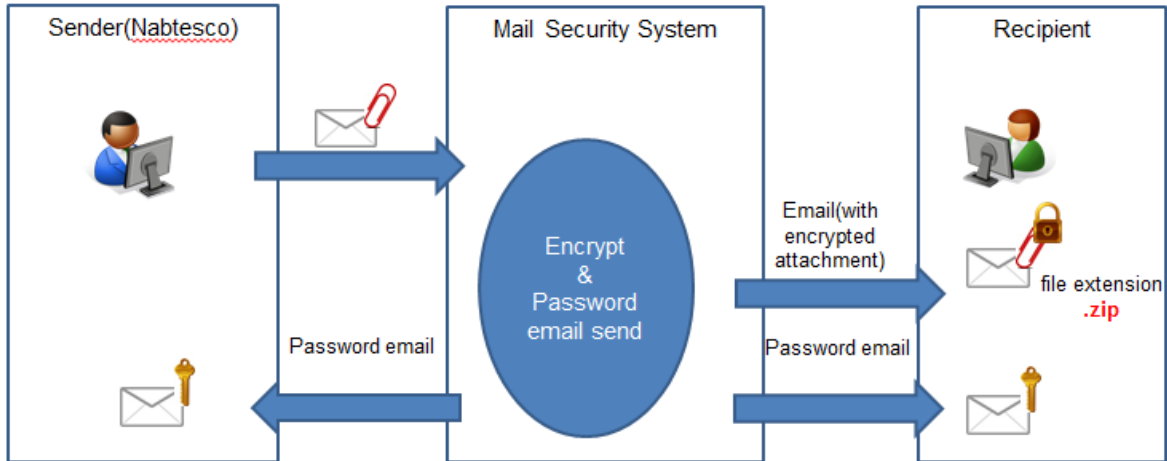

System Centre, Information System Department, Corporate Planning Division
Tel: (+81) 078-993-0218

We apologize for any inconveniences that the changes may cause.
Thank you for your cooperation.

Sincerely
Nabtesco Corporation

◆ Reference

【Flow of encrypting attached file】

◆ How to open file with extension .zip

- ① Open the attached **.zip** file in the Email (Decompress)。
- ② Input the password which is sent in a separate Email
