## **Certified by the Science Based Targets (SBT) Initiative for Alignment with the 1.5 degrees Celsius Scenario**

Nabtesco Corporation (headquarters: Chiyoda-ku, Tokyo; President & CEO: Katsuhiko Teramoto) hereby announces that on September 9, 2021, the Nabtesco Group's long-term CO<sub>2</sub> emissions reduction targets were certified to be aligned with the 1.5 degrees Celsius scenario by the Science Based Targets (SBT) initiative, an international organization that tackles climate change issues.

Nabtesco upholds "Contributing to social progress and environmental conservation" as one of the important items of its long-term vision for 2030. In particular, Nabtesco regards carbon-free measures as the most important item for its management materiality, and this fiscal year, set its new long-term CO<sub>2</sub> emissions reduction targets. The company has obtained the aforementioned certification for these targets.

In order to achieve the new long-term CO<sub>2</sub> emissions reduction targets, the Nabtesco Group will globally foster energy conservation activities, and is planning to introduce highly energy-efficient equipment to its production bases and build/rebuild its plant facilities by using the latest environmental technologies. Moreover, Nabtesco will foster energy creation activities, including solar power generation, and conduct examinations for the procurement of renewable energy (purchase of renewable energy certificates).

The Nabtesco group will continue to work toward solutions for environmental and social issues for the creation of a sustainable society, and will further speed up its measures to tackle climate change issues toward the future.

### **【Long-term CO<sub>2</sub> emissions reduction targets (aligned with the 1.5 degrees Celsius scenario)】**

	2015 (Baseline year)	2030 (Down 63%)	2050 (Down 100%)
Global emissions (t-CO <sub>2</sub> )	54,803	20,277	0
