

## Awarded the Highest Rating from the CDP Nabtesco Included in the “Climate A List 2017”

Nabtesco Corporation (headquarters: Chiyoda-ku, Tokyo, President & CEO: Katsuhiko Teramoto) announces that it was selected for inclusion in the CDP’s Climate A List as one of the world’s leaders in corporate activities in terms of anti-climate change measures and strategies. The CDP is an international non-profit organization that conducts activities for a sustainable economy. The organization has now included Nabtesco in the Climate A List for two years in a row.

As an international NGO representing 803 institutional investors around the world who manage assets totaling 100 trillion US dollars, the CDP collects and evaluates information concerning greenhouse gas emissions from companies and their efforts towards implementing anti-climate change initiatives. Following the 2017 survey conducted by the CDP, 112 companies were included in the Climate A List from among those around the world that had disclosed their climate change-related information to the CDP. Climate A List companies account for 5% of the total number of companies that disclose information to the CDP, which uses its own established methodology to choose those with outstanding results in reducing greenhouse gas emissions and implementing anti-climate change measures in the target year.

This year, Nabtesco was included in the List in recognition of its long-term greenhouse gas emission reduction target set in December 2016 being approved by the Science Based Targets (SBT) Initiative as a target that met the decarbonization level necessary for the achievement of the 2 degree Celsius target set in the Paris Agreements, as well as its use of the energy monitoring system to implement new measures, proactive disclosure of global data through the use of the Group’s environmental information collection system, expansion of the third-party verification scope for disclosed data, and the introduction of highly energy-efficient technologies to its new manufacturing facilities.

Nabtesco will conduct activities in line with its CSR Basic Policy and implement The Nabtesco Way to ensure management transparency and provide safety, comfort and a sense of security, thereby fulfilling its corporate social responsibility. The Company will continue to implement measures in a systematic manner to solve environmental and social problems and contribute to the achievement of the SDGs while pursuing the continued improvement of its corporate value.
